American Rescue Plan Elementary and Secondary School Emergency Relief – Homeless Children and Youth (ARP-HCY)

PROGRAM OFFICE	Office of School Support and Accountability, OESE
CFDA NUMBER	84.425W
PROGRAM TYPE	Formula Grant

On Thursday, March 11, 2021, President Biden signed the American Rescue Plan Act of 2021 (ARP) into law. In recognition of the extraordinary impacts of the COVID-19 pandemic on students experiencing homelessness, the ARP included an unprecedented \$800 million to support the specific needs of homeless children and youth via the American Rescue Plan Elementary and Secondary School Emergency Relief – Homeless Children and Youth (ARP-HCY) Fund. State educational agencies and local educational agencies (LEAs) must use ARP-HCY funds to identify homeless children and youth, to provide homeless children and youth with wrap-around services to address the challenges of COVID-19, and to enable homeless children and youth to attend school and fully participate in school activities. The Department will release ARP-HCY funds in two separate disbursements (ARP Homeless I and ARP Homeless II).

PLANS TO TRACK THE IMPACT OF ARP-HCY

- The CSPR from SY 2020-21 through SY 2024-25 will have questions that ask States to list the following information about ARP-HCY grantees:
 - The number and names of LEAs receiving ARP Homeless I grants and the award amounts
 - The number and names of LEAs receiving ARP Homeless II grants and the award amounts
 - The number and names of LEAs participating in ARP Homeless II consortia with the total award amount assigned to the lead LEA
- All other EHCY data comes to ED at the LEA level so we can connect enrollment, academic achievement, ACGR and chronic absenteeism to ARP-HCY LEA grantees.
- The Department has reserved up to \$1M for a national study and technical assistance related to ARP-HCY implementation.

Findings from the Transitional Living Program Youth Outcomes Study

Youth Outcome Study Background

- Conducted from January 2017 to June 2021 to better understand key youth outcomes in **housing, employment, earnings, and education** before, during, and after program participation
- Explored how the **COVID-19 pandemic** may have affected TLP services and participants' experiences regarding outcomes of interest
- Part of a larger research effort that included TLP Demonstration Program Evaluation and TLP Pilot Study aimed at **measuring TLP impact on the lives of runaway and homeless youth**

Study Participants

30 Transitional Living Programs and Maternity Group Homes participated in the study

365 youth were enrolled:

- 57% female
- 80% between ages 18-20 at entry
- 3% younger than 18
- 39% White
- 39% Black
- 26% Hispanic/Latinx
- 17% MGH youth
- 100% participated in TLP for at least 1 month prior to the start of the study

Exhibit 1.2: Thirty TLP grantees from 17 states participated in the Youth Outcomes Study

TLP YOS Findings

Housing

Of the 56 youth who exited TLP during the period of the study, **less than 1 in 10 experienced homelessness immediately upon exit**, with similar rates observed three months after exiting.

Education

Rates of **enrollment** in post-secondary education were **higher prior to TLP entry than for enrollment while in a TLP**.

Youth who were already enrolled at start of TLP (8%) remained enrolled an average of 12 months.

Exhibit 2.2: Most youth exited TLP to permanent housing situations.

TLP YOS Findings

Employment

Youth **employment rates were higher** during their time in TLP than those prior to entry, but **still experienced substantial employment instability.**

Earnings

Average earnings remained similar to rates prior to TLP entry. **Only 27% of youth had earnings above the poverty level.** Earnings were shown to be higher three to six months after exiting TLP.

TLP YOS Limitations

- The study was conducted with no control group. That is, no sample of youth outcomes was observed for young people who were eligible to enter a TLP but did not.
- Not all youth involved in study exited a TLP during the research period.
- Much of the observation and data collection was during a global pandemic, which impacted education stability, employment practicality, and housing precarity.
